20. Formal Reliability Analyses of Power Line munication

Communication network is one of the primary elements of the Smart Grid for sending and receiving the bi-directional flows of important information such as load flow, faults, etc., in a reliable and efficient way. In this regard, G3-Power Line Communication (PLC) network is the most ideal preference over wireless or wired communication technology due to low cost, high throughput and better ...

Schumann, "Conventional and unconventional reversible **logic** gates on Physarum polycephalum," International **Journal of Parallel, Emergent and Distributed Systems**, 2015, DOI: 10.1080/17445760.2015.1068775.

22. Labelled Sequent Calculi for Lewis Non

C. I. Lewis' systems were the first axiomatisations of modal **logics**. However some of those systems are non-normal modal **logics**, since they do not admit a full rule of necessitation, but only a restricted version thereof. We provide G3-style labelled sequent calculi for Lewis' non-normal propositional systems. The calculi enjoy good structural properties, namely admissibility of structural ...

25. A norm enforcement mechanism for a time

This paper presents the formalization for a system that monitors and enforces regulative time-constrained conditional norms through sanctioning, for agent societies. The representation here has the advantage of allowing for qualitative and quantitative interval-based temporal constraints between a norm's condition and its effect. The system possesses mechanisms for monitoring both norm ...
